

# FANTASTIC® SHADE CLIPS

## INSTALLATION GUIDE

### INSTALLATION SAFETY RULES AND DISCLAIMERS

- ⚠ Shut the power off at the circuit breaker box before beginning.
- ⚠ Small Parts.  
**KEEP OUT THE REACH OF CHILDREN.**
- ⚠ This product should be installed by an adult.
- ⚠ These products are made with resistant materials, but they should be checked for wear frequently.
- ⚠ We are not responsible for the integrity of the electrical box or fans installation that our product is intalled on.
- ⚠ If you are not sure of the integrity of your fans install  
**DO NOT USE THIS PRODUCT.**
- ⚠ This product may NOT work with a fan that has an integrated light fixture unless an additional strap is purchased.
- ⚠ It is suggested to not use a shade 5 lbs or more with these parts.

### INCLUDED IN PACKAGE

**4 Clips**  
**1 Strap**  
**1 Spider cut template**

#### Necessities:

- Ladder
- Scissors

### 7 EASY STEPS TO INSTALL

#### Step 1

If your fan is existing, remove the light cover/s. It will make the install easier.

#### Step 2

Take the Fan-Tastic adjustable strap and locate a flat space around the light housing at least 1 to 1 ½ inches below the fan blade.

#### Step 3

Place the strap around the light housing and pull it tight, but allowing the strap loose enough so that the shade clips will be able to clip on easily.

#### Step 4

Clip each shade clip one by one onto the strap.

If your shade has 3 arms on its spider, place 3 clips and spread them out evenly. If your shade has 4 arms on it's spider, place 4 clips on the strap and spread them out evenly as well.

Tighten the strap a little more if needed. Make sure you can still slide the clips if you need to adjust them with the spiders.

### Step 5

Lift your shade up to the underside of the fixture. If you have pull chains be sure to pass them through the center of the shade.

### Step 6

You will have to maneuver around the spiders to set the open end of the spider into the clips.

Move the clips as needed so that the spider arms are resting inside each one of the shade clips..

### Step 7

Tighten the strap so that there is no movement and it is secure and **you are done!**

### Step 8

If you have strap leftover you can snip it with a pair of scissors.

### Result:

### Notes

- You can put the fixture covers back on if you choose but it is not necessary and may get in the way of the new fan-shade.
- If you have control chains that hang from the center they will still work as they did.

## HOW TO USE WITH AN INTEGRATED FAN LIGHT

**To order an additional strap go to [FantasticShadeClips.com](http://FantasticShadeClips.com)**

**After fitting the two straps together follow the same steps 1 - 7 on page 4.**

Fantastic Shade Clips express enthusiasm and passion, a collective energy, to experience new beauty in your space while enhancing energy savings of our resources.

With great gratitude.
